

Petition 04-160 is unconstitutional and violates the satellite broadcasters' right to provide services NAB member companies such as Clear Channel, Citadel, Entercom, Emmis, etc. don't and won't provide. These companies give millions of dollars to the NAB and use the public airwaves to try and squash competition including satellite radio. Consumers should have the choice of 24/7 traffic and weather instead of just "on the 10's."
